

## SM1000 Pressure Cabinet

The SM1000/P20 is a specialized blast cabinet fitted with a certified pressure vessel, making it ideal for aggressive blasting and cleaning.

Suitable for cleaning corroded steel components and creating a surface profile.

### Aggressive

Fitted with a certified 20L pressure pot, the SM1000/P20 is ideal for aggressive industrial blasting & cleaning.

### Manageable workspace

The SM1000/P20 comes standard with a fitted turntable, assisting the blasting of larger components.

### Practical

Fitted with two doors for easy loading and internal fluorescent lights for visibility.

### Durable & robust

The SM1000/P20 is urethane-lined for greater wear-resistance. A stainless steel mesh provides extra protection for its glass window.

### SM1000 / P20

|                                       |               |
|---------------------------------------|---------------|
| Length                                | 1000mm        |
| Depth                                 | 850mm         |
| Height                                | 1850mm        |
| Internal Height (including turntable) | 800mm         |
| Air Consumption                       | 84CFM at 6bar |
|                                       | 2350LPM       |
| Weight                                | 125kg         |
| Light                                 | 220V          |

### Fast

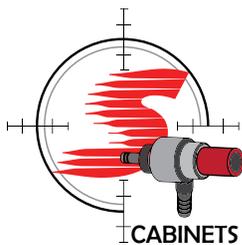

Ideal for cleaning C and D rust-graded steel. 8-10 times faster than traditional suction cabinets.

*strictly superior*

Complete with 6.5mm venturi blast nozzle

**Enclosed, pressurized blasting!**

**Ideal for steel abrasives (steel grit or shot)**

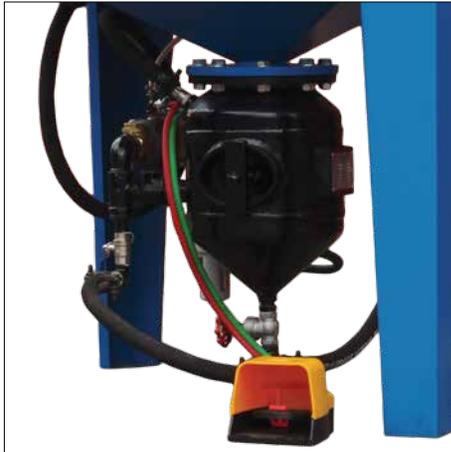

### Double Extractor

|                   |        |
|-------------------|--------|
| Length            | 400mm  |
| Depth             | 850mm  |
| Height            | 1210mm |
| Power             | 220V   |
| Filter Cartridges | 8      |
| Weight            | 125kg  |

## Turntable

The SM1000/P20 comes standard with a turntable, making it easier to manoeuvre and access parts during the cleaning process.

## Certified 20L Pressure Vessel

A 20L certified pressure vessel facilitates the usage of steel abrasives, making the SM1000/P20 ideal for heavy duty cleaning and blasting. The pressure vessel is able to hold up to 50kg of steel shot or grit and is operated by a stop/start foot pedal.

## Cyclone

When blasting with finer abrasives such as glass grit/beads, a Cyclone pre-filter is required to help recover abrasives that can be recycled.
