

Storm 100 Blast Helmet

High-quality blast helmet designed to comply with increasing health and safety regulations.

A comfortable fit, improved durability and greater field of vision ensure that the Storm 100 outperforms any traditional vinyl helmet.

Improved comfort

The Storm 100 blast helmet has been designed to fit over safety earmuffs (instead of painful earplugs), greatly reducing noise levels and improving the comfort of the blaster.

Visible

A vivid, orange alumina coating improves the visibility of the blaster on site. An orange reflective strip is also placed on the back of the helmet to aid visibility.

Durable

Not only does the orange alumina coating make the blaster more visible, it has been specifically selected for its wear-resistant properties which help extend the lifespan of the helmet.

Designed to comfortably fit over safety earmuffs!

New, wide design caters specifically for safety ear muffs

Improved, double vinyl lip provides increased protection

Improved field of vision with double visor

strictly superior

Every Storm 100 Blast Helmet comes standard with a pair of safety earmuffs

Improved field of vision

As opposed to traditional vinyl blast helmets, the Storm 100 uses a double layer visor consisting of a 1 x 1mm visor and a 1 x 0.5mm visor, as opposed to a fine mesh. This significantly improves the blaster's line of sight while still providing protection.

Vivid orange alumina greatly improves visibility of blaster and does not absorb heat

Convenient storage ring

Reflective strip improves blaster's visibility

Easy to store

A specially fitted ring enables the Storm 100 Helmet to be hung up and stored, keeping it out of harms way and increasing its life-span.

Improved protection

The front of the Storm 100 Blast Helmet is fitted with a double vinyl lip for improved protection from deflected particulate matter.

**Also available in leather*
