

Sponge Blast Pot

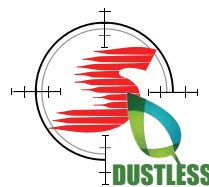

Innovative sponge blast pot setup that maintains low levels of dust emissions.

Convert any pressure-tested blast pot without altering the design of the shell!

Storm Machinery's innovative and simplistic sponge blast pot format can convert any pressure-tested blast pot into a sponge blaster, keeping capital output on equipment low!

Must be used in conjunction with Storm XP blast nozzle

Multi-abrasive application

The simplicity of design allows for the use of sponge blast abrasives as well as standard expendable abrasives.

Abrasives can be recycled

The advantage of using sponge blast abrasives is that up to 80% of the abrasives can be recycled.

strictly superior

Lower dust emissions!

Sponge cells expand and capture dust and debris.
