

Conventional Spray Pumps

2L Remote Paint Cup

2L remote paint cup ideal for small jobs and touch up painting.

Sizes & Specifications

Max. working pressure	4 bar
-----------------------	-------

Advantages

- Lighweight & portable
- Easy to flush & clean
- Suitable for small jobs and touch up painting
- Spray at any angle (including upsdite down)

*1m paint hose set recommended

DP3 - Standard Diaphragm Pump

Standard, robust diaphragm with air-driven motor.

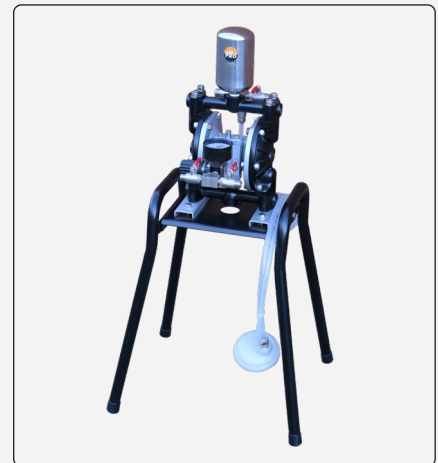

Sizes & Specifications

Ratio	1:1
Delivery	28 LPM
Max. working pressure	Up to 7 bar

Advantages

- Spray high volume solid content paint at low pressures and flow rates
- Easy to flush and clean
- Run two spray guns

*Not a pressure vessel - pressure certificate required

DP5 - Agitated Diaphragm Pump

Robust, diaphragm pump with air-driven motor & agitator

Sizes & Specifications

Ratio	1:1
Delivery	28 LPM
Max. working pressure	Up to 7 bar

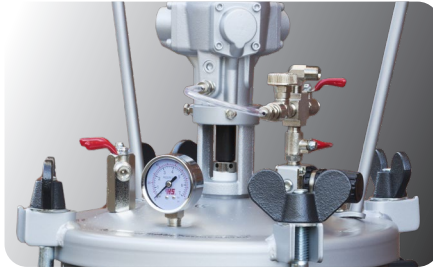

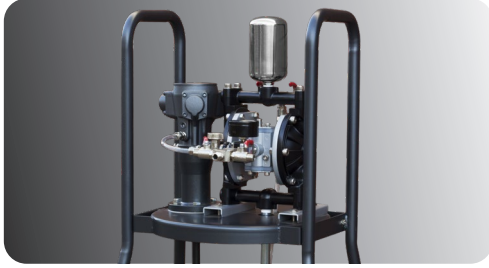

Advantages

- Spray high volume solid content paint at low pressures and flow rates
- Easy to flush and clean
- Run two spray guns
- Air-agitator

*Suitable for the following coatings: Inorganic Zinc Coatings (Zinc Powder), Oxides

*Not a pressure vessel - pressure certificate required

Conventional Spray Pumps

10L Pressure Pot (Non-Agitated)

Standard 10L pressure paint pot.

Sizes & Specifications

Max. working pressure	4 bar
-----------------------	-------

Advantages

- Spray at any angle (including upside down)
- Safety blow-off valve & manual relief valve
- Fewer moving parts = easy cleaning & maintenance
- Stainless steel inner liners

10L Pressure Pot (Agitated)

10L pressure paint pot complete with agitator.

Sizes & Specifications

Max. working pressure	4 bar
-----------------------	-------

Advantages

- Spray at any angle (including upside down)
- Safety blow-off valve & manual relief valve
- Fewer moving parts = easy cleaning & maintenance
- Stainless steel inner liners

*Suitable for the following coatings: Inorganic Zinc Coatings (Zinc Powder)

20L Pressure Pot (Agitated)

20L pressure paint pot complete with agitator.

Sizes & Specifications

Max. working pressure	4 bar
-----------------------	-------

Advantages

- Spray at any angle (including upside down)
- Safety blow-off valve & manual relief valve
- Fewer moving parts = easy cleaning & maintenance
- Stainless steel inner liners
- Air-agitator

*Suitable for the following coatings: Inorganic Zinc Coatings (Zinc Powder)
